

10. Introduction to mCRL2

David Pereira José Proença Eduardo Tovar

RAMDE 2021/2022

Requirements and Model-driven Engineering

CISTER – ISEP

Porto, Portugal

<https://cister-labs.github.io/ramde2122>

<http://mcr12.org>

- Formal [specification language](#) with an associated toolset
- Used for [modelling](#), [validating](#) and [verifying](#) concurrent systems and protocols
- Tool suggestion: use [mcr12ide](#) (not mcr12-gui)

Recall CCS semantics

$$\begin{array}{c} \text{(act)} \\ \hline \alpha.P \xrightarrow{\alpha} P \end{array} \quad \begin{array}{c} \text{(sum-1)} \\ \frac{P_1 \xrightarrow{\alpha} P'_1}{P_1 + P_2 \xrightarrow{\alpha} P'_1} \end{array} \quad \begin{array}{c} \text{(sum-2)} \\ \frac{P_2 \xrightarrow{\alpha} P'_2}{P_1 + P_2 \xrightarrow{\alpha} P'_2} \end{array}$$
$$\begin{array}{c} \text{(res)} \\ \frac{P \xrightarrow{\alpha} P'}{P \setminus L \xrightarrow{\alpha} P' \setminus L} \quad \alpha \notin L \end{array} \quad \begin{array}{c} \text{(rel)} \\ \frac{P \xrightarrow{\alpha} P'}{P[f] \xrightarrow{f(\alpha)} P'[f]} \end{array}$$
$$\begin{array}{c} \text{(com1)} \\ \frac{P \xrightarrow{\alpha} P'}{P|Q \xrightarrow{\alpha} P'|Q} \end{array} \quad \begin{array}{c} \text{(com2)} \\ \frac{Q \xrightarrow{\alpha} Q'}{P|Q \xrightarrow{\alpha} P|Q'} \end{array} \quad \begin{array}{c} \text{(com3)} \\ \frac{P \xrightarrow{a} P' \quad Q \xrightarrow{\bar{a}} Q'}{P|Q \xrightarrow{\tau_a} P'|Q'} \end{array}$$

Processes in mCRL2

Syntax (by example)

$$a.0 \rightarrow a$$

$$a.P \rightarrow a.P$$

$$P_1 + P_2 \rightarrow P_1 + P_2$$

$$P \setminus L \rightarrow \mathit{block}(L, P)$$

$$P[f] \rightarrow \mathit{rename}(f, P)$$

$$a.P \mid \bar{a}.Q \rightarrow \mathit{comm}(\{a_1 \mid a_2 \rightarrow a\}, a_1.P \parallel a_2.Q)$$

$$a.P \mid \bar{a}.Q \setminus \{a\} \rightarrow \mathit{block}(\{a_1, a_2\}, \mathit{comm}(\{a_1 \mid a_2 \rightarrow a\}, a_1.P \parallel a_2.Q))$$

Syntax (by example)

$$a.0 \rightarrow a$$
$$a.P \rightarrow a.P$$
$$P_1 + P_2 \rightarrow P_1 + P_2$$
$$P \setminus L \rightarrow \mathit{block}(L, P)$$
$$P[f] \rightarrow \mathit{rename}(f, P)$$
$$a.P \mid \bar{a}.Q \rightarrow \mathit{hide}(\{a\}, \mathit{comm}(\{a_1 \mid a_2 \rightarrow a\}, a_1.P \parallel a_2.Q))$$
$$a.P \mid \bar{a}.Q \setminus \{a\} \rightarrow \mathit{hide}(\{a\}, \mathit{block}(\{a_1, a_2\}, \mathit{comm}(\{a_1 \mid a_2 \rightarrow a\}, a_1.P \parallel a_2.Q)))$$

$$CM = \text{coin}.\overline{\text{coffee}}.CM$$

$$CS = \text{pub}.\overline{\text{coin}}.\text{coffee}.CS$$

$$SmUni = (CM|CS)\{\text{coin}, \text{coffee}\}$$
act

```
coin, coin', coinCom,
coffee, coffee', coffeeCom, pub;
```

proc

```
CM = coin.coffee'.CM;
CS = pub.coin'.coffee.CS;
SmUni = block({coffee, coffee', coin, coin'},
             comm({coffee|coffee' → coffeeCom,
                 coin|coin' → coinCom},
             CM || CS ));
```

init

```
SmUni;
```

The screenshot shows the mCRL2 IDE interface. The main window is titled "mCRL2 IDE - CM". The top toolbar contains several icons: a folder icon labeled "mCRL2", a folder icon labeled "CRL2", a folder icon labeled "mCRL2", a gear icon with a green checkmark, a gear icon with a green checkmark and a green arrow, a state transition diagram icon with a green arrow, a state transition diagram icon with a blue arrow, a crossed-out state transition diagram icon, and a state transition diagram icon with a question mark. The main editor area contains the following code:

```
1 act
2   coin, coin', coinCom,
3   coffee, coffee', coffeeCom, pub;
4 proc
5   CM = coin.coffee'.CM;
6   CS = pub.coin'.coffee.CS;
7   SmUni = block({coffee,coffee', coin, coin'},
8               comm({coffee|coffee' -> coffeeCom,
9                   coin|coin' -> coinCom},
10              CM||CS ));
11 init
12   SmUni;
```

The right panel is titled "Properties" and contains the text "No properties have been defined". The bottom panel is titled "Console" and contains a tabbed interface with the following tabs: "Parsing" (selected), "Simulation", "State Space Generation", and "Verification".

Logic and Verification

The screenshot shows the mCRL2 IDE interface. The main window is titled "mCRL2 IDE - CM". The top toolbar contains several icons: a plus sign, a folder icon labeled "CRL2", a document icon labeled "mCRL2", a gear with a checkmark, a gear, a state transition diagram, a state transition diagram with a blue arrow, and two property icons (one with a red dashed border and a question mark). The code editor displays the following code:

```
1 act
2   coin, coin', coinCom,
3   coffee, coffee', coffeeCom, pub;
4 proc
5   CM = coin.coffee'.CM;
6   CS = pub.coin'.coffee.CS;
7   SmUni = block({coffee, coffee', coin, coin'},
8               comm({coffee|coffee' -> coffeeCom,
9                   coin|coin' -> coinCom},
10              CM||CS ));
11 init
12   SmUni;
```

The Properties panel on the right is titled "Properties" and contains the text "No properties have been defined". The Console panel at the bottom is titled "Console" and has tabs for "Parsing", "Simulation", "State Space Generation", and "Verification".

Add
properties

Verify
properties

Syntax (simplified)

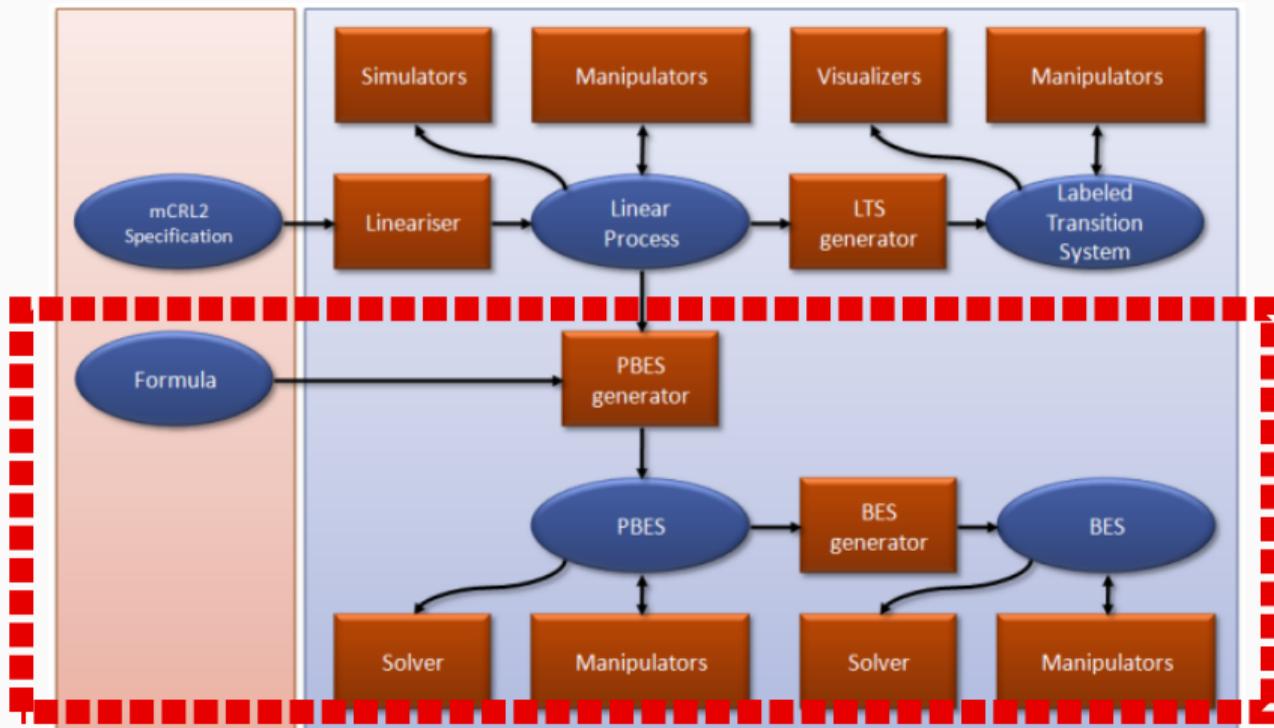

$$\phi = \text{true} \mid \text{false} \mid \text{forall } x:T.\phi \mid \text{exists } x.:T\phi \\ \mid \phi \text{ OP } \phi \mid !\phi \mid [\text{mod}]\phi \mid \langle \text{mod} \rangle \phi \mid \dots$$
$$\text{mod} = \alpha \mid \text{nil} \mid \text{mod}+\text{mod} \mid \text{mod}.\text{mod} \mid \text{mod}^* \mid \text{mod}+$$
$$\alpha = a(d) \mid a|b|c \mid \text{true} \mid \text{false} \mid \alpha \text{ OP } \alpha \mid !\alpha \\ \mid \text{forall } x:T.\alpha \mid \text{exists } x:T.\alpha \mid \dots$$

where $T = \{Bool, Nat, Int, \dots\}$ and $OP = \{=\Rightarrow, \&\&, \parallel\}$

Example

“ $[\text{true}^*.a]\langle b \rangle \text{true}$ ” means: *whenever an ‘a’ appears after any number of steps, it must be immediately followed by ‘b’.*

mCRL2 toolset overview
